EQUIPMENT LEASING & FINANCE

Equipment Revolver LOC

Capital to Keep Things Running Smoothly

A revolving equipment line of credit is similar to a revolving credit facility, except an equipment revolver utilizes a borrowing base formula based on the value of the equipment to determine the maximum loan amount that can be periodically drawn by the borrower.

The company can choose to draw funds to meet working capital needs. The borrowing base is typically recalculated monthly at the time of each advance. This flexible financing solution allows businesses to leverage equipment assets while maintaining ongoing access to capital as business needs change.

Key Features

- Revolving credit structure based on equipment value
- Borrowing base recalculated periodically
- Flexible access to working capital
- Draw funds as needed for operational expenses and growth
- Designed for businesses with valuable equipment assets

Why an Equipment Revolver?

- Leverage existing equipment assets for working capital
- Flexible revolving access to capital
- Supports ongoing operational and cash flow needs
- Funding availability adjusts with equipment value
- Helps businesses maintain liquidity while preserving cash reserves
