ASSET-BASED FINANCING

Purchase Order Financing

Fulfill Large Orders Without Cash Constraints

Purchase order financing is a strategic solution for businesses facing the challenge of fulfilling substantial customer orders due to limited upfront capital. Cash flow constraints can hinder the ability to cover costs associated with order fulfillment, as businesses must often wait up to 90 days for the customer to receive the goods and pay for them. Rather than decline lucrative opportunities, PO finance enables your business to finance projects with minimal investment.

This provides financing to clients for raw materials, cost of goods, direct labor, customs, duties and freight forwarding to fulfill the client's confirmed customer orders. The financing can also include, as needed, issuance of letters of credit to suppliers and cash payments.

Essentially, PO funding capitalizes on a business's active purchase orders to secure funding to help clients pay their suppliers directly. This financing solution works with domestic and international suppliers.

Types of P.O. Financing Available

- Finished Pre-Sold Goods Finance
- Light Assembly Finance
- Production Finance
